Summary

Computer Science graduate seeking a Full-Stack Python Developer, Python Developer, or Frontend Developer role, with a strong foundation in Python, JavaScript, HTML, CSS, React, MySQL, and Django. Proficient in object-oriented programming, data structures, algorithms, database management, responsive web development, and full-stack application development. Familiar with building user-focused applications, integrating frontend interfaces with Python and Django backends, and writing clean, maintainable code. Experienced with Git, GitHub, and VS Code, with a focus on developing scalable, efficient, and reliable web applications.

Skills

Programming Languages: Python, JavaScript (ES6)
Frontend Technologies: HTML5, CSS3, React
Backend Technologies: Python, Django
Database: MySQL
Core Concepts: Object-Oriented Programming (OOP), Problem Solving
Tools & Platforms: Git, GitHub, VS Code
Other Skills: Responsive Web Development, Debugging, Full-Stack Development

Experience

Java Full-Stack Intern **May 2025 – Jun 2025**
Rashtriya Ispat Nigam Limited, Visakhapatnam Steel Plant *Visakhapatnam*
– Tested and validated enterprise application modules using Java and web technologies during a 2-month full-stack internship, supporting application reliability.
– Partnered with the development team to troubleshoot enterprise application issues and contribute to performance improvements throughout the 2-month internship.

Web and Mobile Application Development Intern **May 2025 – Jul 2025**
Datavalley India Private Limited *Remote*
– Enhanced UI components and addressed application bugs across 2 platforms—web and mobile—following real-world development workflows.
– Optimized responsive layouts across 2 platforms—web and mobile—while partnering with cross-functional developers to improve usability and resolve application issues.

Projects

Facial Recognition-Based Automated Attendance System | Python, Django, Open-CV, SQLite | GitHub
– Created an AI-powered attendance management system with Python, Django, OpenCV, and SQLite to automate attendance recording.
– Implemented face detection and recognition workflows to streamline attendance recording and minimize manual data entry.

Online Job Portal | Python, Django, React, AI, MySQL | GitHub
– Engineered a full-stack AI-powered job portal using Python, Django, React, and MySQL with user authentication, job listings, job search, and application management.
– Integrated AI-driven functionality to enhance job discovery and candidate-job matching, creating a more personalized recruitment experience.

Automated Examination Paper Generator | Python, AI, Bloom's Taxonomy | GitHub
– Built an automated exam paper generator using Python and Bloom's Taxonomy to produce structured examination content.
– Structured question-generation logic around defined learning objectives.

Carbon Footprint Monitoring Platform | React, Tailwind CSS, Django, SQLite | GitHub
– Built a carbon footprint monitoring platform with React, Tailwind CSS, Django, and SQLite, featuring interactive dashboards.
– Added carbon tracking and data visualization features to present environmental impact through an interactive interface.

Adaptive Online Examination System | React, Python | GitHub
– Created an adaptive online examination platform using React and Python with performance-based question difficulty.
– Applied performance-based question selection to personalize the examination workflow.

Education

Bachelor of Technology in Computer Science and Engineering | 2022 – 2026
Krishna University College of Engineering and Technology | CGPA: 8.0
Intermediate (MPC)
Narayana Junior College | Percentage: 84.4%
SSC
Narayana E.M. School | GPA: 10.0/10

Achievements & Certifications

• Machine Learning with Python – Embrizon Technologies
• Artificial Intelligence Fundamentals – IBM
• Prompt Engineering and Advanced ChatGPT
• Communication Skills Certification
